Private work (simulation) $\sqrt{s}$ = 14 TeV, PU 200, 3 ab^{-1}
thinning (ρ = 2)
factorisation (≥ R08)
end state ±σln
end state (closure)
B1 direct (ρ = 1)
PU fake candidates per trial
PU 200 only, MET roads
closure T1: anti-conservative (trend: yes)
rungs ≥ R08: zero-count bounds
factorisation ≡ B1 direct at R01-R07 (not drawn)
Nobs/Npred
